FINAL YEAR PROJECTS

Project Name: Hotel Booking Management System

Description:

The Hotel Booking Management System has been designed to override the problem of existing manual system. This web application is supported to eliminate and, in some case, reduce the hardship faced by manual system. The application is reduced as much as possible to avoid errors while entering the data. It's also provided message while entering invalid data. No formal knowledge is required for the user to operate this system. Overall, we said that Hotel Booking Management System is user friendly.

In Hotel Booking Management System we use PHP and MySQL Database. This project keeps the records of booking, clients, and hotel services. Hotel Booking Management System has two modules i.e., admin and user.
